FRUITS AND VEGETABLES ARE INCREASING IN PAWPULARITY

"Fruit and vegetable purees and powders for wet or dry pet meal toppers(...), which said the toppers can entice the most finicky pet eaters while offering highly digestible, natural sources of fiber and antioxidants"

- Novel, functional ingredients for pet treats and toppers, petfoodindustry.com

"In a survey conducted by Nutro earlier in 2017, 90 percent of US dog owners said they try to eat to meet "clean food" criteria for humans, and 75 percent said their clean-eating efforts influence what they feed their dogs."

- Pet food trends: Is clean label the new natural?, petfoodindustry.com

"Blueberries, spinach and other plant products have a long culinary history, which makes them suitable human and pet food ingredients, according to AAFCO."

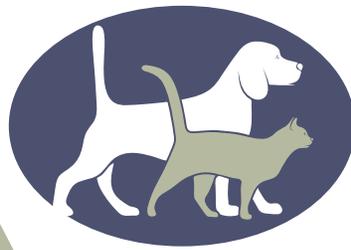

- 3 controversial pet food ingredients debated by AAFCO, petfoodindustry.com

"15.2 percent of dry cat food recipes contain some form of pumpkin."

- Pumpkins source of fiber in dog and cat foods, petfoodindustry.com

"Though consumers are more informed than ever, they may reject brands if they feel overloaded with information, which leads to questioning of provenance, authenticity and transparency"

-Clean label pet food trend works for packaging, too, petfoodindustry.com

PILOT STUDIES

Pilot studies have confirmed the performance of fruit & vegetable juices and purees in standard pet food applications.

DRY EXPANDED (KIBBLE)

Using Not from Concentrate (NFC) fruit puree products.

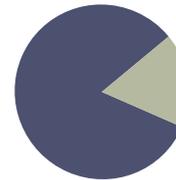

PALATABILITY STUDY SHOWS:

Fruit puree has shown enhanced palatability in kibble.

- NFC Apple puree
- NFC Blueberry puree
- NFC Cranberry Puree

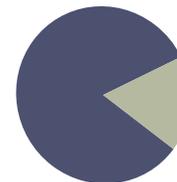

Pilot Studies confirmed an **inclusion rate of up to 17.6%**

Using standard processes and equipment

SEMI - MOIST TREATS

Using juice concentrate products

Juice concentrate can successfully be used as a **humectant replacement at an inclusion rate of up to 17.5%**

Using standard processes and equipment

Clean label advantage over typical humectants.

Can be used as a color enhancement.
